Re: Network security design project

Work completed:
· **Created logical diagram to plan network setup** · **Uploaded Ubuntu ISO file to esxi datastore to configure email server** · **Researched mail server software and decided the server will be running mailcow.**

Work to complete next week:
· **Create mail server VM** · **Configure Ubuntu Server** · **Install Mailcow**

Project successes:
· **Completed initial plans so we can all begin working** · **Laid groundwork for the email server**

Project challenges:
· **Communicating with the team** · **Deciding on OS and mail server software**

Suggestions/Requests:
· **NA**

Project changes:
● **NA**
